STATEMENT IN SUPPORT OF PRE-APPEAL BRIEF REQUEST FOR REVIEW

Sir:

Claim 1 calls for “executing a single instruction multiple data floating point operation”. It is not seen how this possibly could be a mathematical operation. Necessarily, it is a computer operation, and a well-known one. SIMD or single-instruction, multiple-data stream processing is a well-known category of parallel processor computer architecture. The one-instruction processor fetches instructions and distributes orders to several other processors. *See* the attached definition from Microsoft’s dictionary. Thus, executing requires something other than math. A single-instruction, multiple-data point floating point operation is not math but is a computer operation that is a standard kind of operation in computers. Therefore, application to pure mathematics is precluded.
